

# Pola Maj

## Pets in our houses

# Cat

Cats live in 26% of Polish houses.  
They were domesticated thousands years ago.

We know more than 40 official cat breeds.

Cats behaviour depends on their gender,  
age, and growing up conditions.

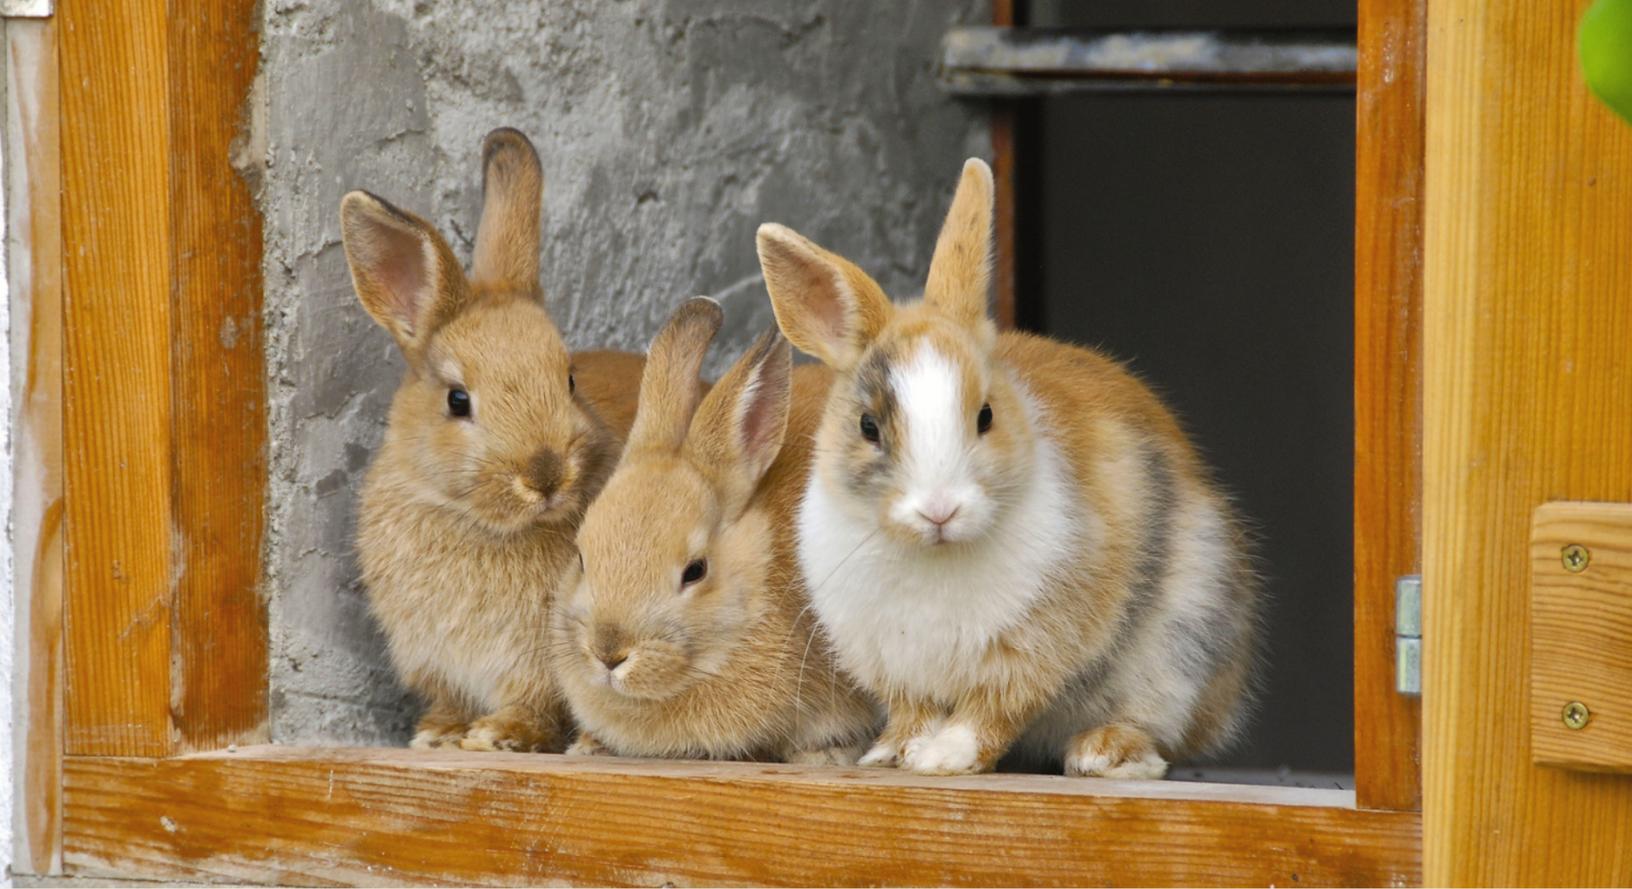

If you are looking for a friendly and cuddly pet,  
cat is the best option!

# Rabbit

Rabbits are one of the most popular pets.  
They are also very sociable, friendly and clean.  
Rabbit maintenance is cheap.

Rabbits should move and jump a lot, because in natural environment they are moving all the time, digging holes and running on the grass.

Every rabbit needs interactions with others, this is very important for them.

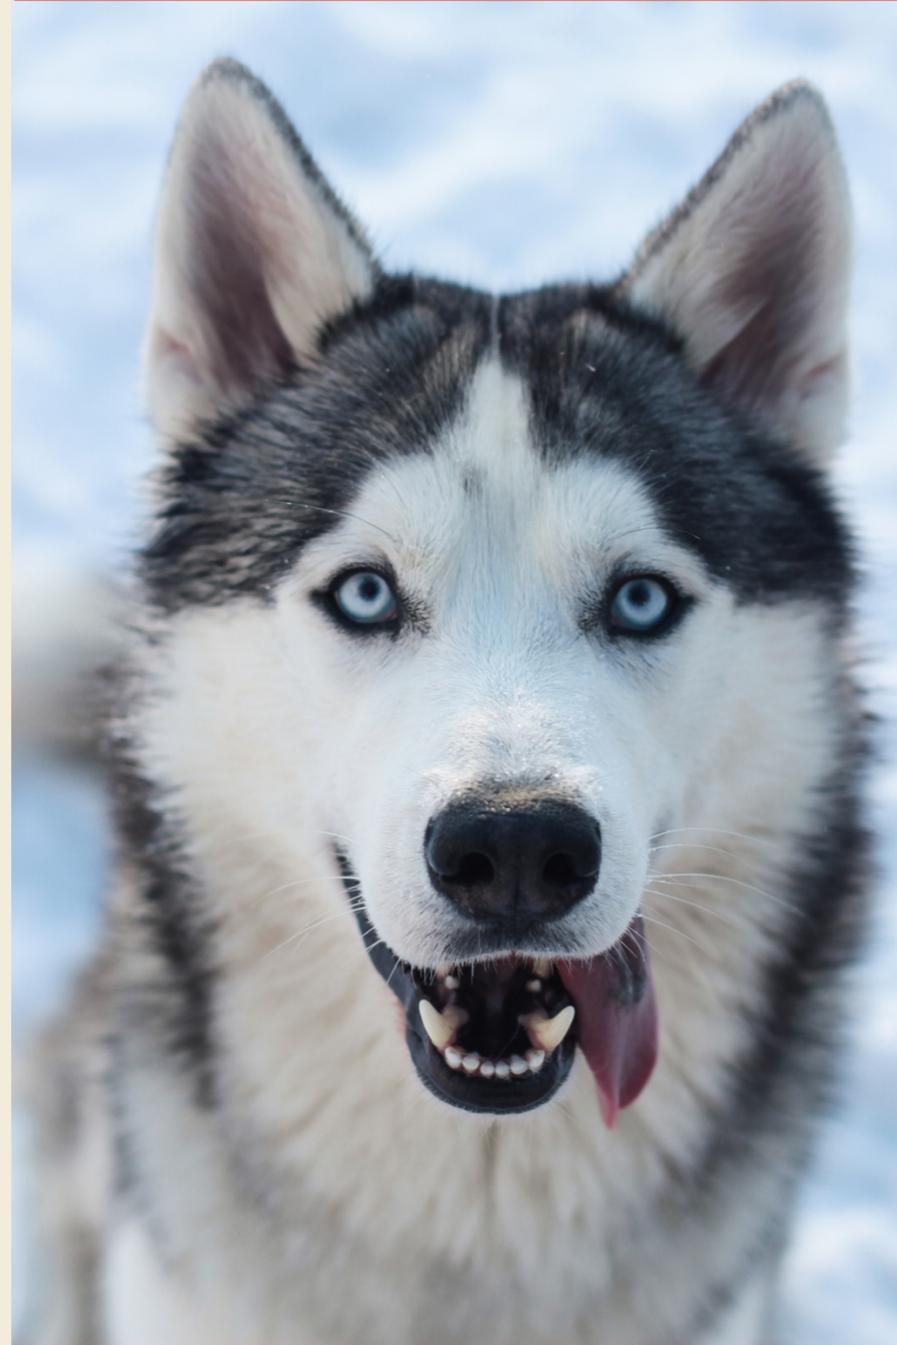

There should be more than one rabbit in every house.

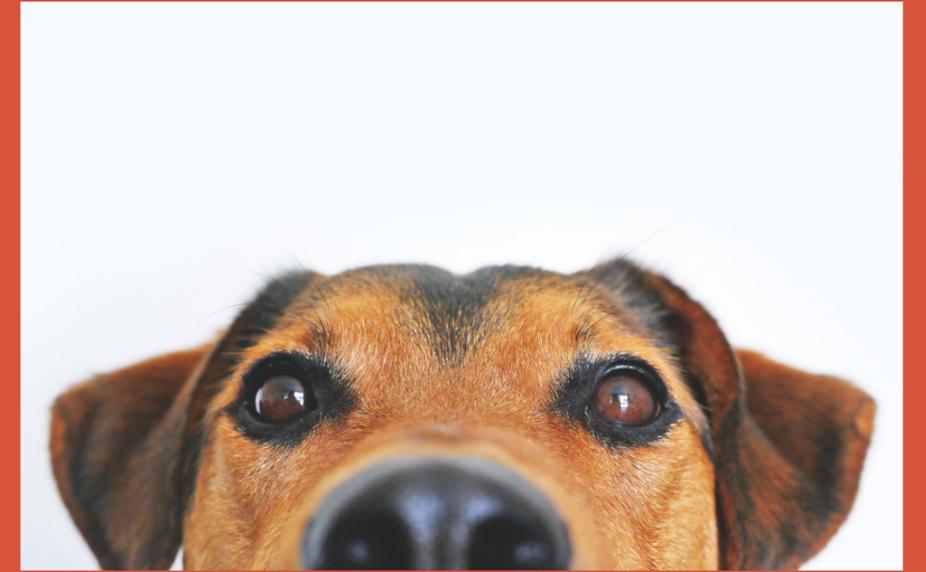

# Dog

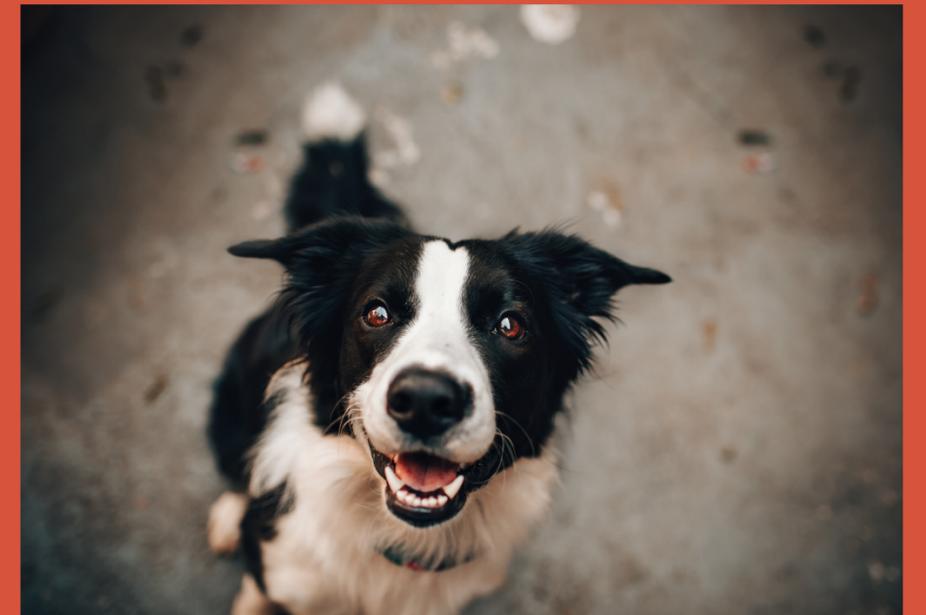

Wolves are the ancestors of the dogs.

Probably dogs started their  
friendship with people around 30  
thousands years ago in north  
Europe.

We know 150 breeds of dogs

# Rat

We know a few kinds of rats which depends on fur colour: Dalmatian, English Irish, Essex, Berkshire, Masked, Capped, Variegated.

Usually rat is around 20 cm long.

Rats are very intelligent and inquisitive.

They live on every continent but not in Antarctica. In the past they lived in the forests alone but later rats moved to cities and now more often we observe rats like a home pets.

# Chinchilla

They look like small rabbits.

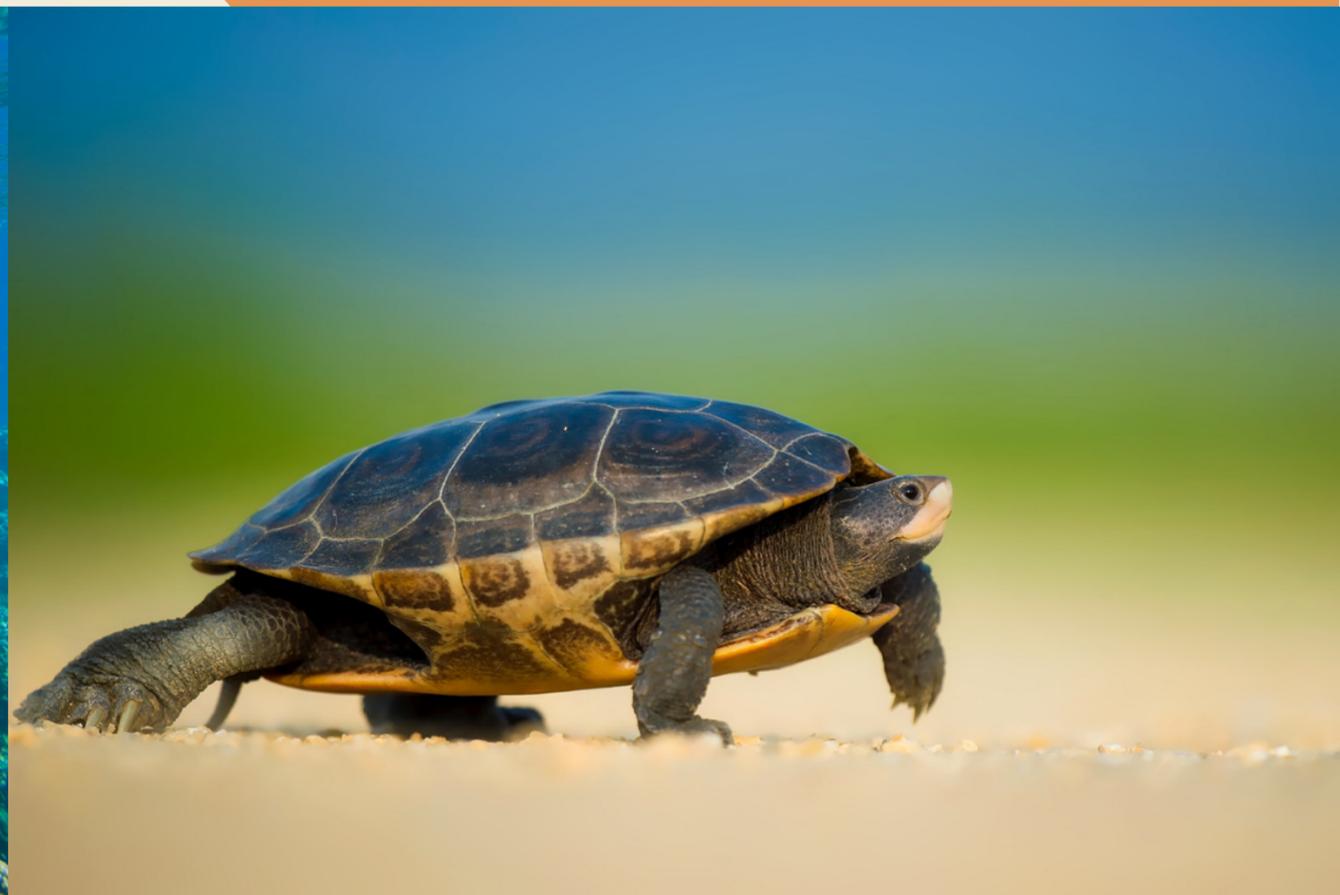

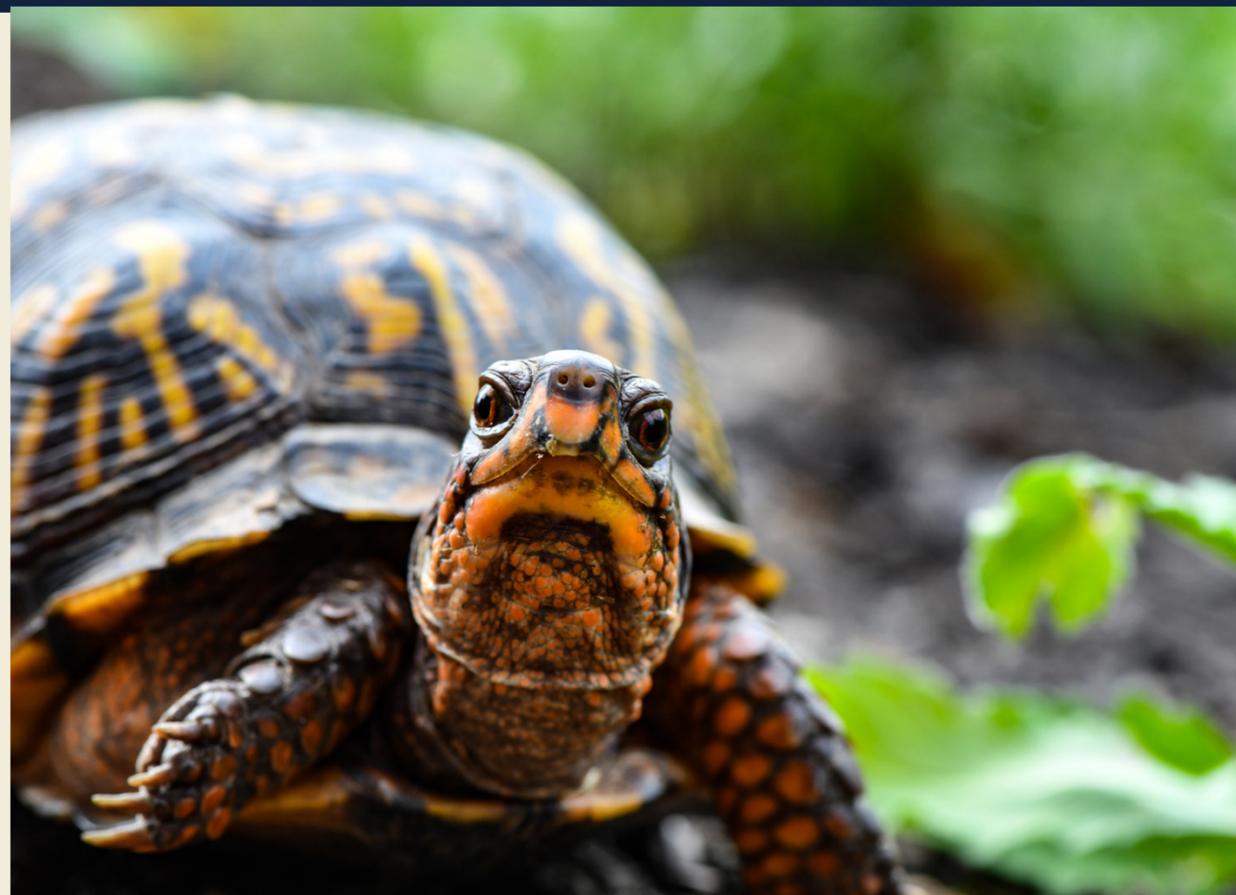

The species is native to South America but now lives in every part of the world like a pet.

It is very smart and lives up to 15 years.

Chinchillas have beautiful fur.

# Turtle

This long-lived species can live 150 years! Turtles can go a long time without any food.

Turtle breeding is for enthusiasts, because they are very demanding. Sometimes we should go outside with them, shower them and lubricate with a cream. In homes turtles live in aquariums.

# Budgies

Budgies came from Australia, usually are 20 cm long and can live 13 years.

They have long dark tails and beautiful waves on the wings.

Budgies are very mobile, so we need a huge cage to keep them in the house.

# Hamster

The most popular in our homes is Djungarian hamster. It weights max 40 grams.

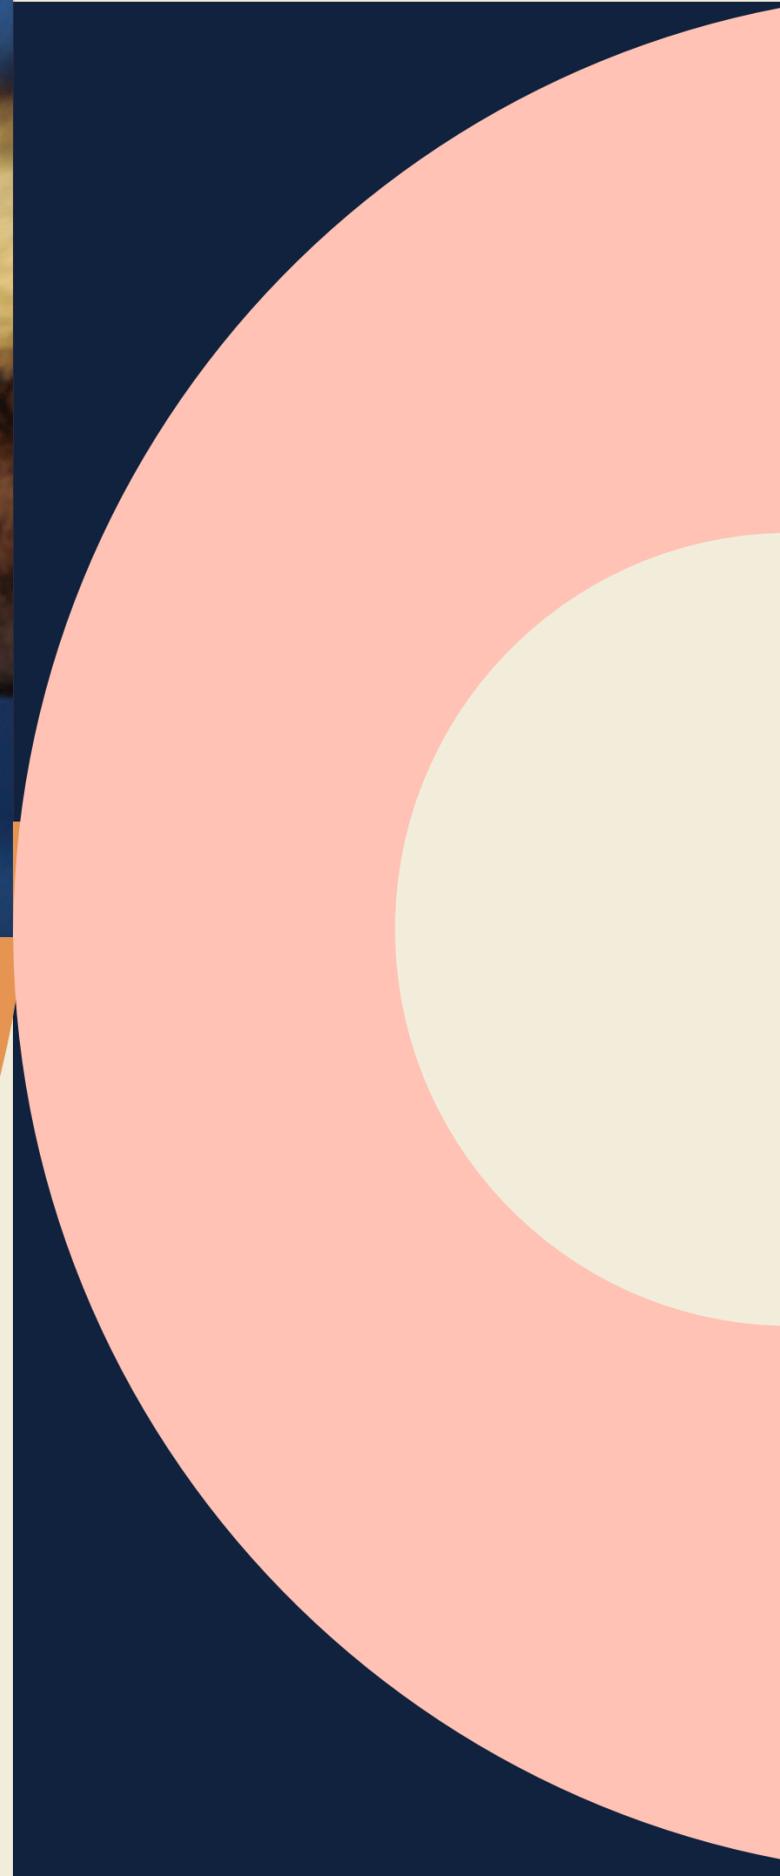

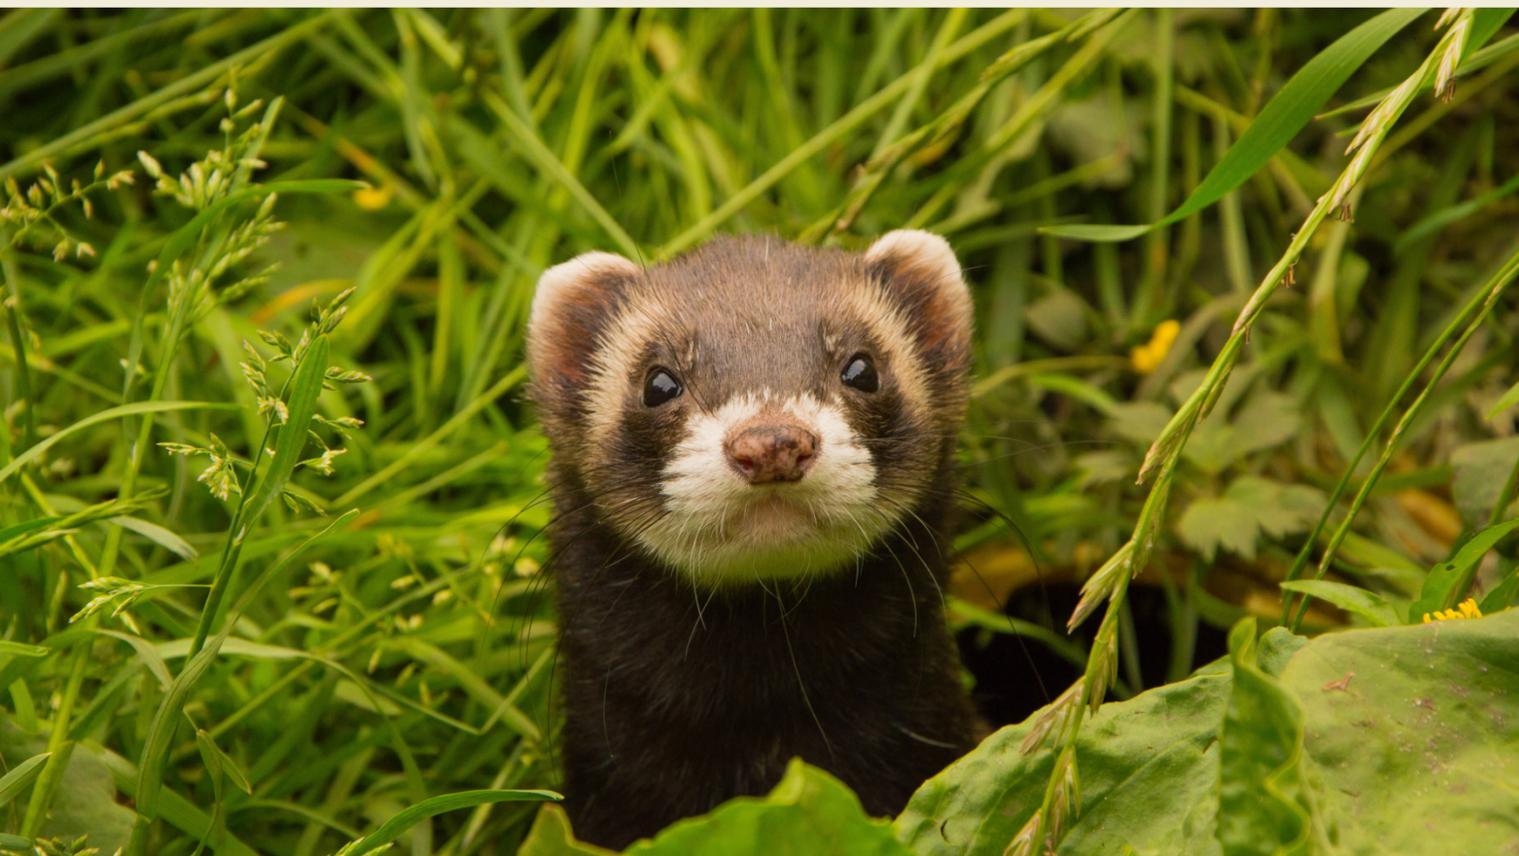

It is very small, friendly and pretty. In one cage can live a few hamsters. They are not very demanding pets.

# Ferret

They like walking on a leash,  
are very sociable and clever and  
like to hide in every hole in the  
house.

They can learn so quickly and  
coming on call, bringing  
something.

Guinea pigs came to our houses from the Andes mountains In South America. They live 6-8 years. Guinea pigs have a lot of varieties, short and long-haired with different colours: white, brown, orange.

# Guinea pig

Guinea pigs have good sense of smell, hearing and sight and can recognize 4 colours: yellow, green, brown and blue.

They eat only plants and vegetables and make a lot of sounds to communicate with other pigs.

Guinea pigs are very friendly, I have my own, her name is Mela

# Thank You all :)

Pets live in every part of the world with people. They give us a lot of fun and unforgettable impressions.

Sometimes pets are our best friends!
